Industry Program

What the Industry Program can offer you?

In partnership with Polytechnic West we can offer students the choice of two Industry Program pathways, along with School Curriculum and Standards Authority subjects so that WACE (Western Australian Certificate of Education) can also be attained.

Certificates delivered as part of the Industry Program are nationally recognised and students will leave school “work ready” in a number of trade areas and with additional points towards entry into a State Training Provider (TAFE).

The Industry Program at Armadale Senior High School is delivered in our comprehensive facilities, including a \$2 million Trade Training Centre. This provides students with outstanding work environment in which to develop their skills in the trades and meeting industry standards.

Our strong link with local businesses, big and small, provides students with the opportunities to complete part of the Industry Program in a workplace, engaging students in relevant and meaningful experiences.

Industry Program Pathways

Year 11 Construction

Cert II Construction

Pre-Apprenticeship - Family of Construction Trades including bricklaying, tiling, plastering, concreting, painting and decorating and carpentry.

Cert I Furnishing

Year 11 & 12 General

Cert 1 Construction

Cert 1 Furnishing

Cert 1 Engineering

Cert 1 Automotive

Both pathways include English, Mathematics, Physical Education and Workplace Learning.

Entry into the Industry Program is by selection and Interview.
